Education

BS in Data Science and Programming

(Jan 2022 - Dec 2025)

Indian Institute of Technology Madras

CGPA :7.5

Skills

Programming Languages

• Python | SQL | HTML | C++

Frameworks & Tools

• Flask | REST API | Vue CLI | Jinja2 templates | Bootstrap | Redis | Caching | Flask-SQLAlchemy | Git | Bash | Node.js | Next.js | React | Streamlit. | Django | Pandas | Numpy | PostgreSQL | Postman

ML/DL Libraries & Techniques

• Scikit-learn | NLP | Speech Technologies| Tesseract | Embeddings | NumPy | Pandas | Matplotlib | Seaborn

Soft Skills

• Leadership | Strategic Planning | Time Management | Problem-Solving | Multi-Tasking | Team Motivation

Work Experience

Research Intern - IIT Madras

(15th Jan 2023 - 3rd July 2023)

- Worked with different Speech Models, Large Language Models (LLM) and Natural Language Processing (NLP) models.
- Trained and Tuned NLP models such as ESPNET, Hybrid Segmentation model, Lip Syncing, HMM (Hidden Markov Model), Language Parser which parses over 13 Indian languages.
- Integration of Gmail API into the website to automate mail to the user (For Dataset).

Intern at IIT Roorkee E-cell

(1st Oct 2024 - 31st December 2024)

- Web development backend using Laravel, PHP and Database. | [Github](#)
- In the project part developed a Task manager system using Laravel and PHP.
- Developed BMS (Booking management system) using Laravel and PHP.

Projects

RAG Architecture

[Github/RAG](#)

- RAG architecture built using **flask framework**, **workers AI API**, **LLama parse for parsing pdf and langchain**.

Software Engineering

[Github/Software-engineering](#)

- Replicated our seek portal with integrated **AI chatbot** using **RAG** to help students in studying and grasping the concepts using **React as frontend** and **Flask as backend**.

Recipe For Rating: Predict Food Rating - Machine Learning

[Github/Machine-Learning](#)

- To examine food ratings based on their review (**Text Dataset**), Have to build models in kaggle where the dataset was **highly imbalanced** and biased with **very low correlation**.
- **Sentiment analysis** was done on the dataset as preprocessing to train models along with **vectorization** to deal with text data.
- **Stacking Classifier** and **Linear SVG** were used to achieve Higher **accuracy Score**

Flight Price Prediction - Machine Learning

[Github/Flight-price](#)

- Prediction of the fluctuation of prices in flight based on their route, duration, destination.

Sponsor Influencer Engagement Platform | Version 1

[Github/Web-Dev-1](#)

- Using Flask, HTML, CSS and Jinja to build a platform where influencers and sponsors can interact and conduct brand deals.

Sponsor Influencer Engagement Platform | Version 2

[Github/Web-Dev-2](#)

- Using Flask, HTML, CSS, JavaScript, Vue.js, Redis (for caching), **Mailhog (for reminder mails)**, **Celery** for task scheduler to build a platform where influencers and sponsors can interact and conduct brand deals.

House Website | Cocurricular Student Website

[Website Link](#)

- Create a visually appealing House website for students to keep a track of all events and a predefined database to verify the users of the house such that they can join the community directly by filling the form itself in the website.

Next Js projects | Election Website for student activities & Fest Website.

- Created a subtle Election website for students to cast vote for the student activities secretary and various other roles | Created a visually appealing website for the fest saavan with automated mail confirmation and basic Db operation in firebase to store users and events data and to host.

Object Detection Model

[Github/Object-detection](#)

- A object detection model was build using **yolo 5 model** to detect object in real time.
- Built in Python

Cocurricular & Position of responsibility

Position of Responsibility

- **Deputy Secretary of Football club** : Organised Orientation session for the Freshers & student football matches frequently.
- **Coordinator in Multimedia Team (May 24-May 25)** : As a photographer covered all the events in the Paradox 24.
- **Web Admin For the House Namdapha (Aug 24- Aug 25)** : Created House website: **House Website** along side managed a huge team of 30 members and lead them to contribute towards the house to the benefit of Student Community.

Cocurricular

- State Level Under 15 Cricketer | Regional Under 19 football Winners | Inter School Under 19 football Winners | Runner's Up in football Paradox 22 | Runner's Up in football Paradox 23 |
